The Hearing Care Centre

The Hearing Care Centre is a new facility for people concerned about their hearing. We have 8 branches in Kent offering a comprehensive range of services – not just for those with hearing loss, but for those with good hearing who would like to keep it that way!

If you put your hearing at risk from noise at work or leisure activities we offer: -

Individual hearing protection – incorporating the latest noise filtering technology that allows conversational speech to be heard at normal levels while potentially damaging high intensity noise is filtered out. We have a range of solutions to suit even the most hazardous noise environments.

Hearing assessments - if you are concerned about your hearing and would like an expert evaluation without the need for medical referral, you can arrange an appointment direct with the Hearing Care Centre.

Custom made Swimplugs – for those with ears that are sensitive to water, these custom made plugs, made from specially formulated silicone rubber, help prevent water entering the ear canal and are also particularly useful for children with grommets.

If you are thinking about a hearing aid : -

If you are a first time, or an experienced hearing aid user, you can take advantage of some of the latest developments in computerised hearing aid technology. The Hearing Care Centre offers solutions that fit completely out of sight in the ear canal. These fully digital 'hearing computers' operate fully automatically or by use of a discreet credit-card sized remote control.

With regular follow-up and aftercare our hearing aid fittings are supplied as part of a comprehensive package to ensure ongoing support for you during the initial post-fitting period and into the future, with our system of annual reviews and checks.

An initial assessment is without obligation. After your hearing evaluation, you will have an opportunity to discuss your individual hearing difficulties and look at a range of options for helping your hearing loss. Our hearing aid service is not associated with any single manufacturer and so we are able to offer genuinely impartial advice on the best hearing aid for you.
