Hearing aid fittings are usually ready within two to three weeks.

Medical Backup

Although you do not need to be medically referred to The Hearing Care Centre, with your consent we like to keep your family doctor fully informed. If we detect a potentially medically treatable condition during your assessment, we can easily arrange for the appropriate medical follow-up.

Three steps to better hearing

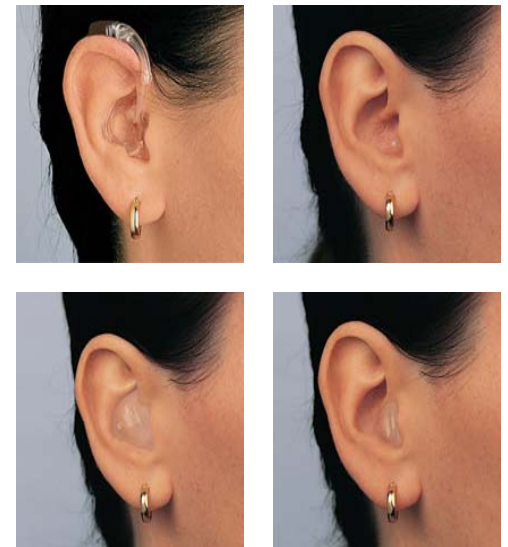

Assessment – this includes an audiometric hearing test together with various procedures to evaluate your ability to hear speech in noisy environments, with a full discussion of your particular areas of hearing difficulty.

Fitting – when your hearing aid fitting is ready, you will be given full instructions on how to make best use of it, and how to get used to being part of the hearing world again.

Follow up – after you have been using your hearing aid for a few weeks, we ask you to come back for a check-up - just to make sure that all is well and to make any tuning adjustments.

The Hearing Care Centre

Wednesdays at:-
Bowden & Lowe
Opticians
117 Watling Street
Gillingham
Kent

A fixed price package of care

An initial hearing aid assessment is entirely without obligation. Your hearing aid fitting includes the following:-

- Initial assessment consultation
- Your new hearing aid(s)
- Your follow-up appointments, as many as you need for 5 years
- Starter pack of batteries and cleaning materials
- Any servicing or aftercare during the warranty period (usually 1 or 2 years but this depends on the type of hearing instrument).

Charges

Prices for a complete package of care start from approx £750.

The exact cost depends on many factors including level of hearing loss, the degree of miniaturisation required and the level of technology needed to solve your problem. We are happy to provide you with a full written quotation following your assessment.
